REPORT ON THE OPERATION  
OF THE  
HOUSING REGISTRY FOR METROPOLITAN TORONTO  
APRIL 1 - JUNE 30, 1971

REPORT ON THE OPERATION  
OF THE  
HOUSING REGISTRY FOR METROPOLITAN TORONTO

APRIL 1 - JUNE 30, 1971

As of January 1st, 1971, a continuing process of up-dating of applications on file was begun by OHC. A report on the up-dated effective demand for Ontario Housing was published as of March 31, 1971, and is to be up-dated quarterly.

The present report shows the status of applications on file with the Housing Registry as of June 30, 1971.

The following are the major findings:

1. As of June 30, 1971, there were 16,094 applicants interested in rent-geared-to-income accommodation under OHC in Metropolitan Toronto. 12,956 of these were families and 3,138 were adults aged 60 years and over.

The updating of applications showed 11,487 of the 12,805 applicants on record as of March 31, 1971, are still interested.

The 4,607 applicants who applied between April 1 and June 30, 1971, are all considered to be interested. These, added to the 11,487 (above) comprise the June 30, 1971, total active waiting list of 16,094.

The foregoing is shown in detail in Table 1.

The findings which follow deal with family applicants only. Applications from single persons under 60 years of age living alone were placed in the family category. The tabulations are as of June 30, 1971.

2. Of those applicants indicating a preference to live in a different Metro municipality than that in which they are presently residing, the greatest number (429, net) mentioned Scarborough as their choice. The decline in preference for the Borough of York was also noteworthy. However, the preferences stated indicated no major change in the distribution of applicants by municipality (Tables II and III).
3. While the numerical distribution of applicants by municipality of residence would remain about the same for municipality of preference, the distribution of bedroom requirements by municipality of preference (Table III) shows:
  - more emphasis on bachelor and 1-bedroom units, taken together, for the City, Etobicoke and Scarborough, and fewer elsewhere;
  - more emphasis on 2-bedroom units in all municipalities except for York and East York; and
  - less emphasis on 3, 4 and 5-bedroom units, taken together, in the City and York, and more emphasis on these units in North York, Scarborough and Etobicoke.
4. No significant difference is indicated in the relative income distribution of applicants for the municipalities of preference compared to the municipalities of residence (Tables IV and V).
5. Over half of the applicants had family incomes of less than \$4,200 per year, or \$350 per month. One-quarter had incomes of \$450 per month or more (Tables IV and V).

6. Over half of the applicants obtained their income from employment, and nearly one-quarter received assistance under the General Welfare or Mother's Allowance programs (Table VI).
7. Almost three-fifths of the applications were from two-parent families (Table VII).
8. About half of all of the children represented by the applications resided in the City of Toronto. Thirty four per cent of all children were in the 0-4 year age-group, 57 per cent were aged 5 to 15 years, and 9 per cent 16 to 18 years (Table VIII).
